

1. Java Date and Time

The [Calendar class](#) is an abstract class that provides methods for converting between a specific instant in time and a set of calendar fields such as YEAR, MONTH, DAY_OF_MONTH, HOUR, and so on, and for manipulating the calendar fields, such as getting the date of the next week.

You are given a date. You just need to write the method, `findDay`, which returns the *day* on that date. To simplify your task, we have provided a portion of the code in the editor.

Example

The method should return as the day on that date.

Function Description

Complete the `findDay` function in the editor below.

`findDay` has the following parameters:

- `int`: month
- `int`: day
- `int`: year

Returns

- `string`: the day of the week in capital letters

Input Format

A single line of input containing the space separated month, day and year, respectively, in format.

Constraints

Sample Input

```
08 05 2015
```

Sample Output

```
WEDNESDAY
```

Explanation

The day on Augustth was WEDNESDAY.

PROGRAM

```
import java.io.*;

import java.util.*;

public class Solution {

    public static String findDay(int month, int day, int year) {

        Calendar cal = Calendar.getInstance();

        cal.set(year, month - 1, day);

        String[] days = {

            "SUNDAY",

            "MONDAY",

            "TUESDAY",

            "WEDNESDAY",

            "THURSDAY",

            "FRIDAY",

            "SATURDAY"

        };

        return days[cal.get(Calendar.DAY_OF_WEEK) - 1];

    }
```

```
public static void main(String[] args) {  
  
    Scanner in = new Scanner(System.in);  
  
    int month = in.nextInt();  
  
    int day = in.nextInt();  
  
    int year = in.nextInt();  
  
    System.out.println(findDay(month, day, year));  
  
}  
}
```

OUTPUT

The screenshot shows a web browser window with the URL <https://www.hackerrank.com/challenges/java-date-and-time/problem>. The page features a green banner with the text "Congratulations" and "You solved this challenge. Would you like to challenge your friends?" with social media icons for Twitter and LinkedIn. A "Next Challenge" button is also present. Below the banner, a table lists test cases and their results:

Test case	Result	Details
Test case 0	✓	Compiler Message
Test case 1	✓	Success
Test case 2	✓	Input (stdin) 1 08 05 2015
Test case 3	✓	
Test case 4	✓	Expected Output 1 WEDNESDAY
Test case 5	✓	

Download links are available for the input and expected output sections.
